

I. Algorithm to find sum of two numbers

1. start
2. input two numbers A and B
3. declare $c = 0$
4. compute $c = A + B$
5. display c
6. Stop

II. Convert Temperature from Celsius to Fahrenheit

1. Start
2. input temperature C in Celsius
3. compute $f = (c * 9/5) + 32$
4. display f

III. Finding smallest of two numbers

1. Start
2. input two numbers num1 and num2
3. check if num1 < num2
 - a. display num1 as smallest
 - b. goto step 6
4. else check if num1 = num2:
 - a. goto step 6
5. else display num2 as smallest
6. Stop
